PR AND REPUTATION MANAGEMENT

I view and practice PR as a fully integrated brand and reputation management function. Brands need to anticipate, plan and rehearse every imaginable scenario that could cause damage or undue attention. It has often been said that it's not if a communications crisis will occur, it's when.

IDENTITY BRANDING

I conceptualise a collection of all brand elements that your Brand needs create in order to portray the right image to your consumer. This branding involves the marketing practice of actively shaping a distinctive brand.
